***REASONS FOR ALLOWANCE***

Claims 15-24 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

In interpreting the claims in light of the specification and applicant's arguments, and the Appeal Brief filed 04/10/2006. Examiner finds the claimed invention is patentably distinct from the prior art of record.

The prior arts of record, Munetomo, Gaglione and Hansen, disclosed a computer including an application and a printer driver, wherein editing of an insertion of at least one of a text, and an image, and a graphic is performed by that application in collaborating with the printer driver.

The prior art of record, Munetomo, Gaglione, and Hansen fail to anticipate or render Applicant's particular feature that allows a printer driver to perform an editing operation of inserting one of a text, an image, and a graphic into a displayed image, wherein a printer driver performing editing processes on image data after a command to print a document has been issued. That is, after a command to print a document has been executed and has been received by a printer driver, then the editing process of inserting at least one of a text, an image, and a graphic into a displayed image can still be performed.

In addition the Examiner interprets the claimed "printer driver", is capable of performing inserting at least one of a text, an image, and a graphic into a displayed image after a command to print a document has been executed and has been received by a printer driver, then the editing process of inserting at least one of a text, an image, and a graphic into a displayed image can still

be performed, which states in the Appeal Brief page 4 last paragraph and supporting by the Applicant Invention Specification Fig. 1A-B and Fig. 2 and page 3 lines 5-15 and page 4 lines 3-6.

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.
